

DBMS Mini Project Review 1

Instructions:

1. Create a document and only one person from the group will upload it.
2. The document to be prepared by following the template given
3. Save your file as: Grupid_MiniprojectTitle_review1.pdf
4. Note: If you have this document handwritten scan and upload it.

- **Group Id:** 21
- **Mini Project Title:** Music Streaming Database Management System
- **Team Members:**

Sr.No.	PRN	Student Name
1	1272260925	Aadi Hanumante
2	1272260894	Yash Gujar
3	1272260928	Ritvik Kamble
4	1272260889	Vedant Parab

- **Problem Statement:** Design and develop a database management system for a music streaming platform that manages users, subscriptions, artists, albums, songs, genres, playlists, listening history, podcasts, and podcast episodes. The system should maintain relationships between these entities and efficiently store and retrieve information such as user subscriptions, playlists, followed artists, songs, listening activity, and podcast episodes. The database should support efficient management of music and podcast content while maintaining data integrity through appropriate constraints and relationships.
